

RACKING BOARD HOIST

Shown with AC brakemotor.
Pneumatic and hydraulic
models also available.

There are few places that the old adage “time is money” holds true like it does on a drill rig. Crews need equipment that will stand up to heavy use in the most demanding environments. Columbia racking board hoists ensure that pipe can be easily positioned as required with minimal effort.

Standard Winch Features

- Automatic braking system
- Totally enclosed planetary geartrains; lubricated with grease for years of maintenance-free service
- Completely sealed construction – no exposed bearings or shaft surfaces
- Low profile, compact design to fit in tight spaces
- Simple installation at any angle
- TEFC, UL-listed motors on AC powered units
- Dependable, long-life vane motor on pneumatic units

Options

- Explosion-proof ratings
- Purpose-built control packages
- Upgrades for superior weather resistance
- Cable tensioning plates, four-roller fairleads, and spooling devices
- Manual override feature for emergency operation in the event of a power failure
- Additional options and upgrades available upon request

Typical Hoist Performance

First Layer		Top Layer		Capacity
Line Pull	Line Speed	Line Pull	Line Speed	
2,000 lbs.	12 fpm	1,146 lbs.	21 fpm	5/16" Rope 84 feet

Based on 115 VAC or 230 VAC 1Ø input power.
